

# Limited Visibility and Poor Management of IP-Connected Devices Threaten Your Operational Efficiency and Uptime

As an IT leader, you're tasked with ensuring smooth operations and cost-efficiency of your infrastructure. Limited visibility of IP-connected devices demands your full attention. Unmanaged devices create risks, while bloated asset databases waste resources and inflate costs. These issues heighten risks, cause downtime, and impede incident response.

## Key Challenges for IT Leaders

### Are Hidden Blind Spots Sabotaging Your Operations?

Limited visibility and poor management of IP-connected devices delay issue detection, leading to increased downtime and operational risks.

### Is Your Team Stuck in Reactive Mode?

Constant interruptions and reactive work due to unmanaged devices reduce productivity and morale. Your team is spending more time firefighting than innovating.

### Are Your Tools Costing More Than They Save?

Disconnected, siloed solutions create inefficiencies, wasted investments, and missed opportunities—potentially costing hundreds of thousands annually.

### Are Compliance Failures Putting You at Risk?

Incomplete asset inventories lead to failed audits, hefty penalties, compliance issues, wasted time, and loss of customer confidence.

## KEY STATISTICS

**69%** attacks target poorly managed assets.

**65%** data recovered due to incomplete backups.

**30%** IT budgets wasted on underutilized tools.

**\$100K+** SOC 2 compliance failures can cost organizations

## Real-World Examples to Consider

- **Travellex**
  - Missed software updates led to a ransomware attack, halting transactions and forcing manual processes
- **Healthcare System**
  - 1,700+ devices were unmanaged, & 5,900+ stale devices were consuming unnecessary licenses
  - \$100K+ wasted on licenses with significantly increased operational risks
- **Automotive Company**
  - 30% inaccuracy in IT Asset Management System
  - Cost \$1.8 million annually in unnecessary labor
- **Equifax**
  - Unpatched vulnerabilities led to a breach
  - Exposed 147 million customer records.

## What Can You Do About It?

**It's time to nail down every IP-connected device and run a tight ship—no more guessing games or blind spots!**

- TFORM changes the game by giving you accurate visibility of all IP-connected devices and resolving discrepancies across all your tools.
- TFORM provides continuous updates, ensuring near 100% accuracy.
- Transform your data from a liability into a strategic asset, driving operational excellence and business growth.

**Let's chat for 20 minutes to explore if TFORM is a good fit for you or not.**
