

TFORM OPTIMIZES ITAM AND ENTERPRISE TOOLS

Patching

- Exposes Devices Not in Patching
- Identifies Stale Devices
- Improves Vulnerability Management
- Identifies Agent Malfunctions
- Eliminates License Waste
- Quantifies Accuracy Against Baseline

Antivirus

- Identifies Devices w/o Anti-Virus
- Quantifies Accuracy Against Baseline
- Improves cybersecurity posture
- Identifies Agent Malfunctions
- Eliminates License Waste
- Identifies Stale Devices

DCIM

- Identifies DCIM gaps
- DCIM vs. ITSM Discrepancies
- Finds inactive DCIM assets
- Optimizes physical resource utilization
- Reduces environmental & license waste

Other

- Automates data reconciliation, reducing manual effort and errors.
- Enhances Decision-Making
- Reduces Operational Costs
- Improves Incident, Request, Change & Problem Mgt.
- Manages device exclusions, providing clear and accountable tracking.
- Provides a single view for duplicate tooling
- Enhances audit compliance.

ITSM

- Helps to Identify Gaps in ITSM Discovery
- Quantifies CMDB Accuracy Against Baseline
- Updates CMDB to near 100% Accuracy
- Reduces Required Integrations
- Frees Up High-End Resources
- Updates Missing & Inaccurate CMDB Attributes
- Establishes ITSM as Source-of-Truth

Cybersecurity

- Exposes Unprotected Devices
- Identifies Unmanaged Devices
- Exposes Shadow-IT
- Improves Compliance
- Quantifies Accuracy Against Baseline
- Reveals Agent Malfunctions
- Identifies Stale Devices
- Eliminates License Waste

Monitoring

- Exposes Devices Not in Monitoring
- Quantifies Accuracy Against Baseline
- Ensures Operational Awareness
- Identifies Stale Devices
- Identifies Agent Malfunctions
- Eliminates License Waste

Backup

- Devices Missing From Backups
- Quantifies Accuracy Against Baseline
- Identifies Stale Devices
- Improves BC/DR
- Eliminates License Waste
